

Model: Sleeve clamps

Sleeve clamps are used to securely clamp off a sleeve which as a damaged glove or is damaged at the lower part of the sleeve.

Can be used together with our glove change bag to ensure sterile exchange of the damaged glove.

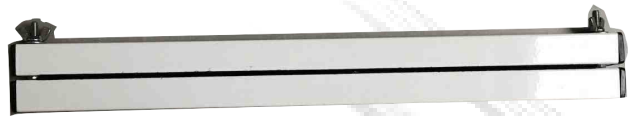

Overall length - approx. 50cm

Available in two options:

Aluminium with screw fixing

CL-SL-ST

fixed via 2 winged screws on either end

Stainless steel quick release clamp

CL-SL-QR

allows quick attachment and release due to hinge and single clip at the front of the clamp
